**Introduction**

United Nations Educational, Scientific and Cultural Organization According to the organization (UNESCO) in May 2020 1.6 in 190 countries around the world due to the coronavirus pandemic Billions of students learn online from traditional learning formats had to switch to the format [1]. Transition to the online format of higher education places the quality of education among teachers and the university new to education, focusing on issues such as image loss set a task to introduce innovations. In the course of online learning in the article about the benefits of using new learning platforms the main focus was on informing readers. Distance learning related vocabulary online learning, online exam, proctoring, completed with lexical units such as Teams, zoom, online TV lessons. The “remote” used in the scientific community today. The concepts of "learning" or "online learning" are synonymous such as lexical units. First of all, this so - called learning process If we look at the history, distance learning as a form of education It has been known in the world for almost three hundred years. Distance learning Born in Boston, USA for the first time. Students in Boston take shorthand and accounting courses without coming to the city got a chance. Mail self- study materials for students received through. Thus, in the United States, there are several types of study by mail or by correspondence has been for centuries. Sending training materials by traditional mail due to the

development of new information technologies in today's society changed its form. In the world practice of distance learning in the USA, Leader of the United Kingdom, Canada, Spain and Italy.

It is known that As mentioned above, these are the state. Media education in the field of education since the 50s of last century and the introduction of the alphabet of media culture. As we have seen, the fourth industrial revolution. The introduction of higher education into our lives will bring great changes to education Yale University scientist Nancy Gleason wrote in her book "Higher Education in the Era of the Fourth Industrial Revolution was stopped [2].

Information in the field of education in modern society It is true that it is impossible to imagine without technology. In general, the ideas of distance learning in the field of pedagogy are fundamental. It should be noted that it is not new. To date, many E. coli. C. Polat, M. Yu. Бухаркина, М. В. Моисеева, А. Е. Researchers like Petrov considered the technologies of the distance learning process in their works [3].

Covid-19 emergency situation in all universities in the country digital technology in a short time to serve teachers turned into well-versed professionals. Teachers online Teaching with technologies, Online professional development courses from Oxford gained experience. The university also organized a seminar on "Distance Learning Problems of organization of multilingual education in the field of technology". The seminar is organized by teachers from the university want to find support.

Scientists believe that the development of the Internet and its capabilities are electronic Exchange information in web discussions such as mail, chat, forums and other technologies interact differently with teachers and students provided opportunities for interaction [4].

#### Materials and methods

In the process of writing the article to the pedagogical literature and documents. The method of comparative-historical analysis and synthesis was used. 2020 of various viruses that cause the COVID-19 pandemic in the world due to the widespread use of remote isolation. Education by reconsidering the educational process before higher education institutions set the task to make adjustments to the transfer process. In this regard, teachers read to develop new methods by adapting the traditional methods used in the process mobilization and effectiveness of distance learning methods began to pay special attention to research. Lectures for students online. It is known that teaching is different from teaching in a traditional audience. Traditional Full-time education has become the basis of distance learning. The main task distance education with the help of modern technical equipment was as close as possible to the full-time system. Distance education within the framework of traditional teaching methods of the teacher's own methods can improve the quality of distance learning. The Covid-19 pandemic online education of teachers with extensive use of information technology set a task to improve the quality of transmission. Educational-methodical complexes, including practical and theoretical. The training materials Moodle video lectures for several years in a row. The location of the necessary educational materials for students on the platform to view and download at any time convenient to them would like to give. This platform is in a pandemic use in conjunction with the Microsoft Teams platform during online lectures. There is an increase in the quality of the educational process.

Microsoft SharePoint in the UK for several years Tony Phillips Teams platform "Setting Assignments in Microsoft Teams for Education" The best way to interact with students in a published article entitled stated that one of the methods [5].

It was cloudy during distance learning at a domestic university use of technology, distance learning of languages. Organizational publications began to appear [6], [7]. "Psychological and pedagogical competence" of teachers in distance learning, "pedagogical technology" of teaching models and forms, its quality is also oriented to pedagogical specialists was not overlooked [8].

#### *Results and discussion*

Information technology professionals use the Microsoft Teams platform. The number of users will grow at the fastest rate in 2018 was predicted. In the next two years after the forecast, in 2020 By the end of the year, 41% of the world's organizations were Microsoft Teams based on the results of a survey conducted using the platform determined by [9]. There are several ways to use the Microsoft Teams platform in the learning process. There are advantages. Zoom with the beginning of online lectures in the country such as intrusion into conferences known to be. And first on the Microsoft Teams platform. The security measures are well established. Teams Azure is confidently cloudy created on the platform. This platform is for third-party users does not allow access to lectures and during the lessons on the platform protects materials and data. The second advantage is that Google can record each lesson on video can be saved to disk. Lesson videos on the platform for 20 days stored. Students can record lessons on Google Drive at any time may be able to view. The third advantage is that the learning process is organized from home Teachers and students may have the opportunity to change the fund. It's as if students are sitting in a traditional lecture hall can choose the background of the audience as shown in the picture. Fourth, feedback from students during online classes. This can be done through the Chat tool. Written translation subjects. During the exercise, students are immediately transferred to the chat room have the ability to write, check each other's notes and write comments. In my practice, a practical lesson on the "chat" page of the Teams platform and provides feedback to students during lectures can be used frequently. Especially during online lectures for students whether you are listening to the lecture orally or at all. Ask students to write their answers on the chat page at the same time can be checked. Students online between lectures or classes 2 – 3 minutes of brainstorming exercises to avoid boredom. You can continue the lesson.

Students of our university study on this platform. The possibility of connecting to the proposed Moodle platform also has. We consider this to be a great advantage in the organization of the educational process. Calendar page on the Microsoft Teams platform using online lesson schedules, extracurricular meetings and Schedule online events like meetings at any time. The ability to change is also an advantage of the platform.

There are advantages:

study in isolation in a pandemic without leaving home availability;

Possibility to combine work with study;

use of modern educational methods;

develop skills in working with large amounts of information;

Ability to join classes from anywhere;

No need to spend time on transport.

The disadvantages of online learning are:

technical difficulties (students living in remote areas

Difficulties connecting to the online platform, picture / sound issues difficulties arising);

psychological barriers;

Microsoft Teams application for students' mobile phones

downloading and accessing lessons from anywhere reduces the quality of lessons;

a large amount of independent work [10].

Conclusion

Pandemic due to the spread of information technology Microsoft Teams as an effective tool for organizing training. The platform is the undisputed leader. Seen in the article rather than a negative impact of the platform on the educational process. The priority is to ensure quality continuity in education It is clear that The Microsoft Teams platform is an online learning process. The only one that allows students to continue their studies has proved to the world that it is the best platform. In my

future research on online education Zoom, Skype, Discord, etc. study of the effectiveness of platforms, as well as the use of distance learning technologies in foreign language teaching. This will be reflected in the development.
